

INTRODUCING...

THE NEW 28V LI RECHARGABLE BATTERY-POWERED

PocketShear™ Lite

- Battery operated with spare battery packs
- Safer than grinders with abrasive blades
- “Green” technology compared to any other method
- Serviceable cutting pieces by trained operator
- Eliminates trip hazards from leads around workers’ feet
- Reduced electrical hazards
- Weight similar to a grinder
- Eliminates kick on start-up and no unguarded cut points
- Built specifically for the stressing industry

REDUCE GRINDER USE ON SITE BY APPROXIMATELY 50 PERCENT!

- **No** blades shattering
- **No** vibration injuries from prolonged use
- **No** burns from hot work piece or blade
- **No** grinder sparks
- **No** eye injuries from debris or work piece
- **No** operator error (Everyone thinks they can operate a grinder!)
- **No** excess power leads running across access ways
- **No** excess power cables across work area
